Langford Veterinary Services Ltd are pleased to announce the introduction of **Interventional Radiology** techniques.

IR has been used with increasing frequency in human medicine for the last 2 to 3 decades, and our extensive range of equipment enables us to offer this service at Langford:

- Fluoroscopy with digital extraction
- Endoscopy
- Laser

Advantages:

- Minimally invasive
- Shorter recovery time
- Competitive treatment cost

A wide variety of conditions can be treated with these **minimally invasive** techniques. Examples include:

- Intra-hepatic porto-systemic shunts
- Tracheal collapse
- Urethral stenting for urethral tumours
- Embolisation of tumours that are surgically unresectable

Please telephone us for advice on any of these procedures.
