Brachycephalic Obstructive Airway Syndrome Spring Promotion Only £950

Dear Colleague,

Brachycephalic obstructive airway syndrome is a common cause of respiratory problems in the short-nosed breeds. Indications for surgery would be severe obstruction, cyanosis and collapse on excitement or on exercise.

Surgery, such as soft palate reduction and rhinoplasty, will often relieve the obstruction and improve quality of life for affected individuals.

Recently it has been better appreciated that concurrent oesophageal disease may exacerbate or worsen the respiratory signs in these patients.

For three months from 1st May 2011 LVS are offering a discounted price on surgery for this condition. The Promotional Price includes:

- ◆ Consultation and assessment for surgery
- ◆ Chest radiographs to exclude concurrent lower respiratory tract disease*
- ◆ Fluoroscopic contrast swallowing studies to investigate concurrent oesophageal dysfunction
- ◆ Upper airway surgery as deemed appropriate
- ◆ 1 weeks medication

*This offer will not cover further investigations for lower airway disease.

Micro Total Hip Replacement now available for £2,500.

- ◆ Total hip replacement is a well established procedure in large breed dogs and has been performed worldwide since the late 1970's.
- ◆ The surgery affords dramatically improved quality of life to patients suffering from crippling orthopaedic diseases such as hip dysplasia and avascular necrosis of the femoral head.
- ◆ Until recently, this surgery has not been available to smaller dogs and cats.
- ◆ At LVS we have recently invested in the Micro THR system, allowing us to offer hip replacement for almost all patients.
- ◆ In order to make this surgery more attractive to your clients, we are able to offer this surgery at a dramatically reduced cost of £2,500. This includes initial consultation, surgery, pre and postoperative radiographs, hospitalisation and VAT.

Contact Reception on 0117 928 9420/9447 if you would like to refer or discuss any condition with our surgeons.

Yours Sincerely
