

Cat Genetic Test Submission Form

Owner's name	
Address	
Email	Telephone:

	Name	Microchip No	Reg No	Breed	DoB	Sex
Cat 1						
Cat 2						
Cat 3						
Cat 4						

Tests required (place x in box)	Example	Cat 1	Cat 2	Cat 3	Cat 4	
Bengal Progressive Retinal Atrophy (PRA-b)						
Burmese GM2						
Burmese Head Defect						
Burmese Hypokalaemia						
Congenital Myasthenic Syndrome (CMS)						
GSD IV (Norwegian Forest Cat)						
Maine Coon HCM						
Mucopolysaccharidosis VI (MPS VI)	x					
Persian Progressive Retinal Atrophy						
Polycystic Kidney Disease (PKD)						
Progressive Retinal Atrophy (rdAc)						
Pyruvate Kinase Deficiency (PKDef)						
Ragdoll HCM						
Spinal Muscular Atrophy (SMA)						
Agouti Colour						
ALC Agouti Colour						
Amber Colour (Norwegian Forest Cat)						
Blood Type	x					
Burmese Colour						
Chocolate Colour	x					
Cinnamon Colour						
Coat Length						
Dilute Colour						
Siamese Colourpoint						
Total No. tests per cat	3					Grand Total (inc. VAT)
Price per cat (see over) inc VAT	£60.60					£

I declare that the cat(s) presented for sampling is/are described above, that the particulars provided are correct and that I am the legal owner of these cat(s). I agree that sample(s) may be used anonymously for statistical and research purposes, which may be published. I understand that cats submitted in this way will not be eligible for entry onto FAB negative or GCCF active registers. Payment must be made at the time of submission. Please make cheques payable to Langford Veterinary Services Ltd. You can also pay online by Debit or Credit card at www.catgenetics.co.uk.

5 tests	£72.50	£87.00	£58.00	£69.60
6 tests	£83.50	£100.20	£66.80	£80.16
7 tests	£94.50	£113.40	£75.60	£90.72
8 tests	£105.50	£126.60	£84.40	£101.28

Members of registered breed societies are eligible for a 20% discount on all genetic testing. Please supply a Breed Society Promotional Code (available from your breed society) to obtain these prices. If they have not yet registered please ask them to contact us.

We also accept requests for EXTRA genetic tests on samples sent to us within the past two years. Please contact us at catgenetics@langfordvets.co.uk with the cat's name, Lab Number, date of original sample submission and EXTRA genetic test(s) required.

Please note - samples are occasionally used for research and development purposes and may not be available for EXTRA genetic testing.

How to swab your cat

1. The cat's mouth should be free of food therefore delay sampling for at least an hour after the cat has eaten.
2. Kittens can be tested from birth, but since they should be removed from the mother 30-60 minutes before sampling we recommend they are not tested until 2-3 weeks of age.
3. A standard dry, floq swab, cotton tipped swab or cyto brush is used.
4. If using a Q-tip cut off one end and discard (do not touch the remaining cotton tip).
5. Insert the tip into the cat's mouth between the cheek and gum.
6. Twist the swab several times to collect the cheek cells.
7. Remove the swab from the cat's mouth and return it to its protective sleeve (use a separate envelope or plastic bag for each Q-tip).
8. Label the plastic sleeve, envelope or plastic bag with the cat's name.
9. Complete the submission form and enclose it with your samples.

Please note: The test is run on DNA extracted from the cheek cells, not on saliva. Failure to collect adequate cellular material on the swab will result in a failed genetic test result. The genetic test identifies if a sample fails, in such cases repeat sampling will be required.

IF YOU ARE SUBMITTING SAMPLES FROM ABROAD PLEASE SEND 2 SWABS PER CAT.

Please post your samples to:
